

Opportunity for a Geoscientist

Introduction

GEPlan Consulting s.r.l. (www.geplan.it) a global consulting firm based in Italy and expert on the characterisation of fractured and carbonate reservoirs and in the interpretation in thrust-belt settings is recruiting a geoscientist with experience in the oil and gas business.

Job Description

The position will require to work as part of the GEPlan Consulting team in exploration to development projects for our Oil and Gas clients.

Main tasks will include interpretation of subsurface datasets (seismic and other geophysical datasets, well and production data), review and integration of different datasets to characterise the exploration and development potentials of assets and sedimentary basins, support to GEPlan training courses.

The job will be mainly carried out from our Italian office in Ferrara but travels and fieldwork abroad will be required.

Qualifications, Experience and Skills

The candidate will have/be:

- Minimum a Master degree in Geoscience/Petroleum Geology
- >5 years' experience in the E&P for hydrocarbons business from field to basin scale
- User of Petrel, IHS Kingdom, OpendTect, Petromod, ArcGis and graphic software
- Experience in 2D and 3D seismic interpretation, well log analysis, core description
- Advanced understanding of structural geology, carbonate sedimentology & diagenesis and deep water depositional settings
- Fluent in English (Spanish, French and Arabic languages are a plus)
- Advanced communication and presentation skills
- Able to work as part of a multidisciplinary team
